You're invited...

Mullica Watershed Planning Project 2nd Public Meeting

Tuesday, October 30, 2001

6-8 pm

**South County Regional Branch
Library, Atco, NJ**

**(exhibitor tables open ½ hour
before & after meeting)**

To protect water quality, water supply and the natural resources of the Mullica River Watershed, the NJ Pinelands Commission, in coordination with the NJ Department of Environmental Protection, is working with other stakeholders to develop a management plan for the Mullica Watershed.

Public participation and education is critical to the success of our watershed management plan, and opportunities for public involvement are incorporated throughout the planning process. **This meeting is one of many opportunities for you to continue to share your ideas and get involved!**

At our first public meeting, we asked you for your goals, objectives and issues for the watershed project. At this meeting, we'll be discussing how your ideas are being used in the development of a vision statement and formation of technical focus groups, and asking for more of your input. We're also looking for your "Action Now" project ideas to improve water quality in the watershed. (Background materials will be available online at least two weeks before the meeting at www.state.nj.us/pinelands/mullica, or call us to request paper copies.)

If you'd like to attend this meeting, please RSVP to Chris Krupka, Watershed Coordinator, at 609-894-7300 so that we can plan for the appropriate number of people. We've also invited organizations within the watershed to exhibit their information—we invite you to visit their tables before and after the meeting. We look forward to seeing you on October 30th!
